Since 1958 Hillaldam has been opening doors for South African businesses, homes and industries. We are now called upon to open the door to a safer and healthier future for all South Africans. This is how we intend to heed that call:

**IN CHALLENGING TIMES WE ALL NEED TO PLAY OUR PART TO SECURE A SAFER FUTURE FOR ALL.**

**HILLALDAM IS:**

- Adapting our production lines to incorporate urgently needed essential items
- Continuing supply of known solutions for hospital door applications
- Partnering with other manufacturers to create a turn-key solution for hardware, doors and installation
- Using our national footprint and unique set of skills to assist government and the medical fraternity in setting up facilities to combat this enemy wherever the front line may be

3. Washable pvc screen material
4. Ideal for privacy and contamination minimization
Hillaldam understands the effect this pandemic will have on business, the individual and the country’s fiscus.

In an attempt to mitigate this, Hillaldam commits to the following:

- Donate 2.5% of purchase price to the Government COVID-19 Solidarity Response Fund
- Purchase back all used hardware at 5% of the purchase price once it is no longer needed. *This is above current scrap value of goods*
- Despite the risk, remain available to service the medical community in their time of need
- All beds bought back will be donated to the less fortunate such as; orphanages, public hospitals and charities.
A WORD FROM OUR CEO, ROWAN DANCER.

Hillaldam is a 62 year old proudly South African Manufacturer.

We are proud to be part of this country and this economy, and we are therefore ‘rolling up our sleeves’ to assist in our country’s time of need.

Together we all need to fight this invisible enemy, and bring this country and our economy back from the doldrums this enemy has created.

We are proud to be South African, proud to be Hillaldam, and proud to be able to answer the call for help.
